

Fast Detection of Contamination in Food & Drink and the Environment

Speedy Breedy is an easy to use compact, portable instrument that enables food and drink manufacturers to test for contamination in-situ, even on the factory floor without the need of specialist staff.

You should buy Speedy Breedy IF:

- ▶ Time to detection means financial benefits for the business
- ▶ You'd like to assess risk in shipping inventory before test results come back from the lab
- ▶ You don't have an on-site lab
- ▶ You'd like to be able to test raw ingredients prior to manufacture
- ▶ You are using HACCP in your business
- ▶ You'd like to test for environmental hygiene on-site

Wow!!! Rapid! Portable and New!
